

Connecting Student Chromebook to your Home WiFi Altice “Free Optimum” WiFi

Step 1

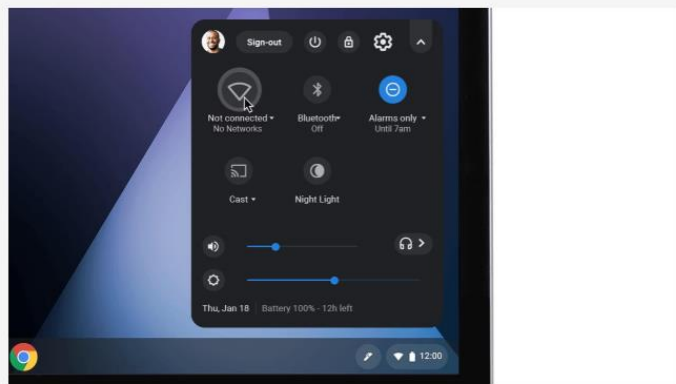

Click on the Quick Settings Panel at the bottom right of your screen.

Step 1 Click by the Clock

Step 2

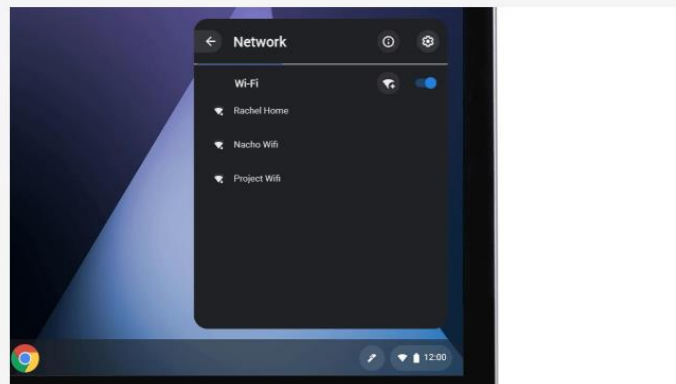

Click on “no-network.”

Step 2 Click on no-network / WiFi

Step 3

Select your Wifi Network.

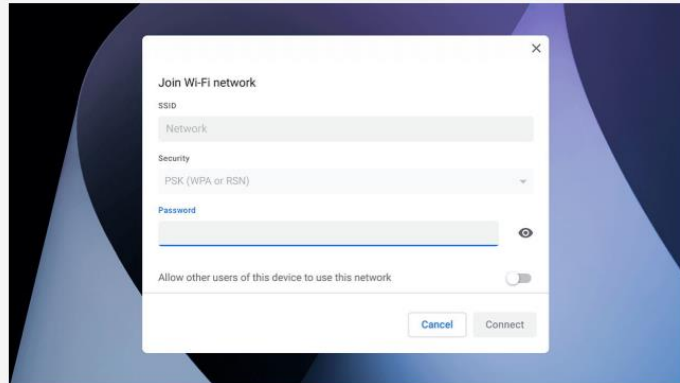

Step 3 Select your WiFi:

For home WiFi you should see the name of your WiFi previously created for your home. Click on your “home wifi” next go to Step 4.

Please note: For the free Optimum WiFi or other service providers, the name will be called “optimumwifi-Emergency”. After you click on this one, you will get a pop up from Optimum. Please read what it says then click on **accept and connect** to continue to the internet.

Step 4

Pick one and enter the password if it calls for one.

Step 4 If connecting to your home WiFi or any other WiFi such as a mobile hotspot **(not including the free Optimum)** you will need to enter the password to connect to it.

Logging into Chromebook:

To log into the Chromebook you must use your child’s school computer login and password. The format is as follows:

Username - firstname.lastname (using the second lastname in cases where you may have two (2)) ex. Mary Smith-Johnson would be Mary.Johnson

Password – Student’s nine digit student ID, if the student’s ID is **less than 9 digits** place zeros in front to make it nine digits (ex. 123456789 or 001234567)

Technical Assistance:

If you need any technical assistance with the Chromebook, please email our tech support team below which corresponds to your child’s school.
